

Maths Competition!

In the Maths Pupil Voice Survey, many of you shared that you do not know or you are not sure **what makes a good mathematician**. Below are 9 statements which make us a good mathematician.

We would like to create a poster with these statements **but we need your help!**

In this competition, you will need to create a little picture which relates to each of the statements to put on the poster. You can use symbols, draw cartoons, write key words, use colours... just remember it has to be drawn by you! Your work could be featured in every Wellington Maths book.

Please ask your teachers for the template if you would like to enter this competition.

All entries must be handed to Miss Mistry, Mrs Strange, Mrs Pannu or Mrs McCarthy by Monday 18th November!
